## PROJECTS

### Food Delivery Website • 04/2024 - 05/2024

Welcome to our Online Food Delivery platform, your go-to solution for ordering delicious meals from your favorite restaurants. Developed using Laravel, our platform offers a seamless, efficient, and secure experience for users to explore menus, place orders, and enjoy their favorite dishes delivered right to their doorstep. Key Features 1. **User-Friendly Interface:**

- Intuitive and responsive design for an optimal user experience on both desktop and mobile devices.
- Easy navigation through various restaurant categories, cuisines, and meal types.

#### Restaurant Listings:

- Comprehensive directory of local restaurants with detailed profiles, including menus, ratings, reviews, and photos.
- Advanced search and filter options to help users find restaurants by cuisine, location, and price range.

#### Online Ordering System:

- Simple and secure ordering process with real-time updates on order status.
- Customizable options for meal preferences, special instructions, and delivery details.

#### User Authentication and Profiles:

- Secure registration and login with email verification and password recovery options.
- Personalized user profiles to save favorite restaurants, order history, and delivery addresses.

#### **Order Tracking:**

- Real-time order tracking from preparation to delivery.
- Push notifications and SMS updates to keep users informed about their order status.

#### **Reviews and Ratings:**

- User-generated reviews and ratings for restaurants and individual menu items.
- Moderation tools to ensure the quality and authenticity of reviews.

#### **Promotions and Discounts:**

- Integration with marketing tools for promotional campaigns, discount codes, and special offers.
- Personalized promotions based on user preferences and order history.

#### **Admin Dashboard:**

- Comprehensive dashboard for restaurant owners and admins to manage menus, orders, and user interactions.
- Analytics and reporting tools to monitor sales, customer feedback, and performance metrics.

### **Real Estate Management • 01/2024 - 02/2024**

Welcome to our Real Estate Management platform, your ultimate solution for seamless and efficient property management. Developed using Laravel, our platform offers a robust, secure, and userfriendly interface to meet all your real estate needs. Key Features

#### **Property Listings:**

- Easily list residential and commercial properties with detailed descriptions, photos, and amenities.
- Advanced search filters to help users find properties by location, price, size, and more.

#### **User Management:**

- Secure user authentication and role-based access control for administrators, agents, and clients.
- Manage user profiles, track activities, and monitor user interactions with properties.

#### **Property Management:**

- Comprehensive dashboard for property managers to oversee all properties, including availability, lease agreements, and maintenance requests.
- Automated notifications for lease renewals, rent payments, and property maintenance.

#### **Booking and Scheduling:**

- Integrated booking system for property viewings and appointments.
- Calendar management for agents and clients to schedule and track property visits.

#### **Interactive Maps:**

- Integration with Google Maps for location-based property search and visualization.
- Highlight nearby amenities such as schools, hospitals, and public transport.

### **SKILLS**

Communication, Problem Solving, Coding
